Attachments: ATT00001.txt; TPC Port Neches Daily Summary 12-10-2019.pdf

Importance: High

Good morning,

Here's the latest draft of their Daily Summary/Executive Summary/Sitrep.

My only comment back to the facility is to remove the word "monitoring" for the last section. This will be attached to the 209 and provided with the 209.

On another positive note. First topic that came up this morning from the facility is "what is the plan for endpoints and when can we downshift?"

I explained:

Water containment/recovery operations are going into a Maintenance phase this week. Check.

One known active leaking tank (33) being addressed. Project closure this week.

Inhibitor operation began on 12/09/19 with no issues. Check.

No emissions impacting the community for almost a week. Check

Transition document has been shared with the state with one revision (canal name). Check.

Crow/Bordelon, please get me the second 1900 by Friday. I need an update on the expenditure status asap through the day before the 1900.

I'm projecting, if we have no new hurdles in the next 2 days, we will be demobilizing on or by this weekend. I appreciate all the work on this from all of our team.

If you recognize any issues not addressed above that present a hurdle, please notify me asap so we can address it and keep with this plan.

VR,
Adam

Subject: TPC Port Neches Daily Summary 12-10-2019

Please find the attached Daily Summary that is intended to be provided to several agencies.

I didn't distribute this to the whole group, but I can if needed.
Please let me know if you have questions or comments.

Thank you.

Becky
